A proposal for _____

For the Headteacher / Director

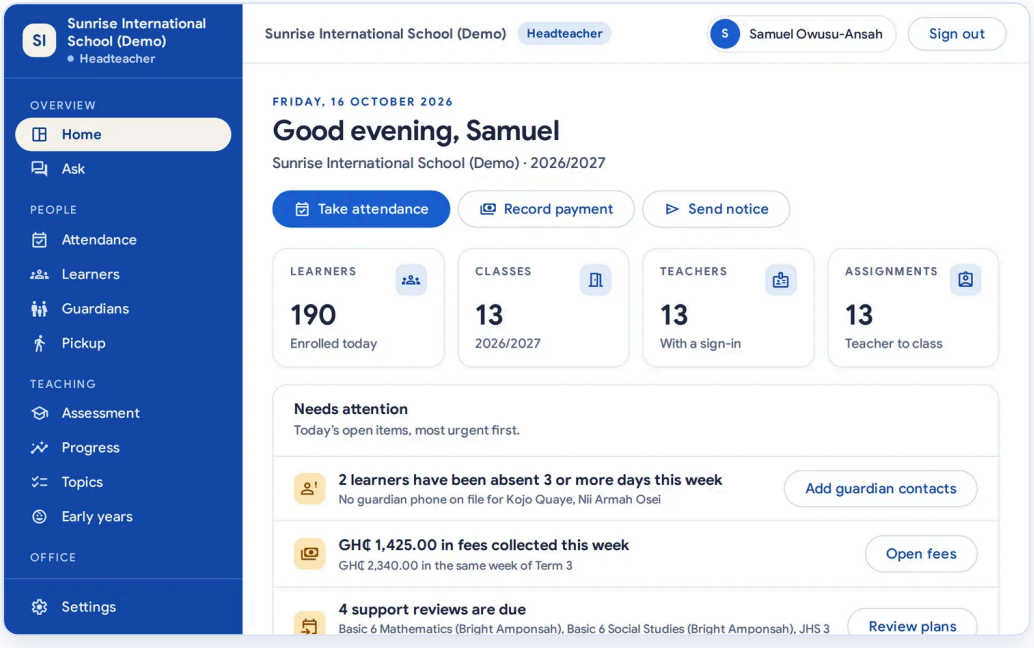

Run your whole school from one phone. It costs your school nothing, and it earns your school money every term.

Veloxa SmartSchool runs registers, fees, report cards and parents for Ghanaian basic schools, from Nursery to JHS. It also tells the head in seconds what would normally take a week of asking around.

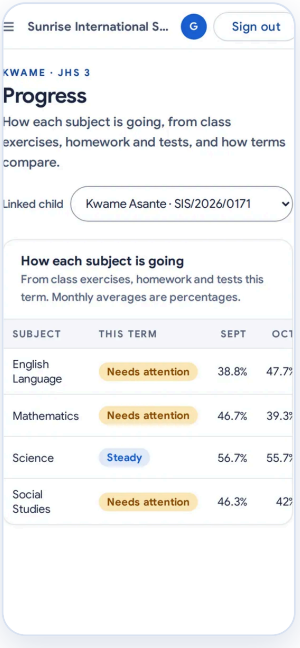

WHAT CHANGES FROM NEXT WEEK

The office work you do by hand, done for you.

	TODAY	WITH SMARTSCHOOL
Attendance	Register books that nobody adds up.	Teachers mark the register on their phone in two minutes. You see **every class, and every child who keeps missing school**, before break.
Fees	Ledgers, guesswork and arguments at the gate.	Bills, numbered receipts and balances by class. You know **exactly who owes what**, and each parent sees their own statement.
Report cards	A weekend of adding, ranking and rewriting.	Teachers enter scores. **Totals, positions and grades work themselves out** with your school's own weighting. You check, publish and print.
Parents	They find out at the end of term.	Report cards, fee balance, progress and school notices **on the parent's own phone**.
Knowing your school	Asking around, then waiting.	Type a question: *"How much in fees is outstanding?" "Who is struggling in Basic 6?"* **The answer comes from your own records in seconds.**

The headteacher's Today page (a demo school with sample data).

What a parent sees.

No computers needed. Teachers use the phones they already have.

THE OFFER

Your school pays nothing. Not now, not later.

GH₵0
Setup fee. We load your classes and learners from the Excel list you already have.

GH₵0
Subscription. Registers, fees, report cards, notices and questions are free to the school.

GH₵0
Training. We come to your school and get your staff started.

And your school earns money.

Parents who want extra help at home can buy the **Home Learning Pass, GH₵50 per child per term**: short lessons and practice every evening on the topics their child finds hard, built on your own teachers' term topics and approved by your teachers.

Your school receives about GH₵15 from every pass (30%), paid each term with a statement of counts and amounts.

Learners	Each term	Each year
200	GH₵900	**GH₵2,700**
400	GH₵1,800	**GH₵5,400**
800	GH₵3,600	**GH₵10,800**

If 3 in 10 families take the pass. Launch partner terms, after mobile money fees. Report cards, fee statements and notices stay free for every family.

BEFORE YOU SAY NO

Every reason to wait, answered.

"We can't afford it."
There is nothing to afford. The school pays nothing, and the school is paid.

"Our children don't have devices."
They don't need any. Classwork stays on paper. Home learning runs on the parent's phone.

"We are already managing."
Managing costs your staff hours every week and leaves fees you can't see. This gives that time back.

"Our teachers are not computer people."
If they can use WhatsApp, they can use this. Big buttons, plain English, on the phone in their pocket.

"What about our records?"
Your school is sealed off from every other school. Teachers see only their classes, parents only their own children, and children's names never go to the AI.

"What if it doesn't suit us?"
Then you stop. There is no fee to lose and nothing to cancel.

Saying yes costs nothing.
Saying no costs hours every week, fees you can't track, and money that could come to your school.

Next step: a 15-minute look at a full demo school on your own phone, then we set up your school. We are signing our first partner schools now.
